

Word Association Test (WAT)

Word Association Test (WAT) is another projective method conducted by SSB. It is a psychological test to reveal one's personality.

Meaning of WAT

WAT is a projective technique in which the individual is presented with a list of words one at a time and asked to respond with the first idea/thought that comes to his mind. This test is also known as **idea writing test**.

It is a test of personality and mental function in which the candidate is required to respond to the words shown. These words can be used in any form, i.e. the word 'awoke' can be used as awaken and awakening.

Reason for Conducting WAT

The Word Association Test is a common method within psychology which has been used to reveal the personal world of an individual. The test reveals the candidate's verbal memories, thought processes, emotional states and personalities.

Through this process, psychologists examine the nature and probabilities of the response words and sometimes the amount of time it takes to respond. This test was devised by a famous psychologist to reveal the person's reality and autonomy of unconscious complexes.

Way of Conducting WAT

1. In WAT, candidates are shown a total of 60 words.
2. All the 60 words are shown one after the other.
3. Each word is shown to the candidates for 15 seconds.
4. During this 15 seconds the candidate has to read and understand the word, think about an idea or a meaningful sentence and write it down.
5. The meaningful sentence to the word should be written in a booklet provided for the purpose by SSB.
6. Out of 60 words at least 45 has to be attempted.

How to Write Positive and Negative Sentences in WAT?

Word Association Test is one of the psychological techniques in which an individual's behaviour is tested through his subconscious mind.

Positive Word Sentence

Write sentence starting with the original word followed by the word showing the role in positive sense, and finally followed by other words doing something positive.

Love Love softens human relationship.

Negative Word Sentence

There will be negative words in the exam. They are to check your thinking capabilities on seeing negative words. When your reaction to a negative word is positive, it will be easy for you to make a sentence from a word. Form a positive idea from a negative word.

Defeat A winner defeat his weakness.

Do's and Don'ts for WAT

Do's

- ♦ WAT is conducted to know your creative thinking and imaginative ability, try to make your own sentences.
- ♦ Let your sentences be more positive and constructive in approach with practicality.
- ♦ While assessing the test, it is keenly observed whether the meaningful sentences are constructed or not, so make logical, meaningful and grammatically correct sentence.
- ♦ Practice constructing sentences related to social, economic and political and cultural field of the country.
- ♦ Learn short and brief quotes and proverbs which can be related to some WAT words.
- ♦ You may change the grammatical form of the word while using it in a sentence. For example, 'beauty' may be used as 'beautiful' in a sentence.
- ♦ Your responses should be natural and crisp.

Don'ts

- ♦ Do not write borrowed or memorised sentences instead make real sentences. This can be done only by having a good vocabulary in memory.
- ♦ Do not be under the impression that making sentences related to army and navy will fetch credit instead they show that your responses are not natural and spontaneous.
- ♦ Don't write sentences which reflects self-acceptance and where you are advocating or recommending others.
- ♦ Don't start the sentences with 'I' because this approach may reflect a self oriented/ self personality.
- ♦ Don't write offending or immoral responses even if you actually think they are correct.
- ♦ Avoid starting sentences with negative words like 'Do not', 'Wrong', 'Impossible', 'Unhappy' etc.

Some example sets of WAT have been given in the following pages. The candidates are required to first understand the word given and then learn it.
